🧠 Loveable memory System.

Hi there, beautiful automator,

Simply copy and paste this into the ball and enjoy the most fantastical memory app on the planet 🤙

Project Goal: Create a Stunning, Centered, and Functional Chat Interface

The primary objective is to create a visually impressive, WhatsApp-style chat interface. This interface must be fully functional, sending and receiving messages from a webhook, and must be perfectly centered on the screen.

Core Requirements:

1. **Design and Aesthetics:**
   - Create a "beautiful," "gorgeous," and "incredible" WhatsApp-style chat interface.
   - The design should be modern, responsive, and visually appealing.
2. **Webhook Integration:**
   - Every message sent from the interface must be sent to the following webhook URL: https://jaaaaaack.app.n8n.cloud/webhook-test/061f91ff-420a-4040-bff7-5f81fb9fb9cd
3. **Chat Header and Avatar:**
   - The chat header should display the name "Memory".
   - The avatar image should be this image of a brain: https://static.vecteezy.com/system/resources/previews/049/697/634/non_2x/detailed-brain-graphic-brain-anatomy-illustration-vector.jpg

    - The name "Fabio Ottaviani" and the original avatar must be removed.
4. **Webhook Payload:**
    - When a user sends a message, two pieces of information must be sent to the webhook:
        1. A number representing the current date as a code (e.g., 20250613).
        2. The message content itself.
5. **Response Handling:**
    - All generic and hardcoded responses must be removed.
    - The chat should *only* display the responses received from the webhook.
    - The webhook will return information in a JSON format, like this: [{"output":"Here's a TL;DR of what I have in memory about you:\n\n- **Unique Communication Style:** You insist that the word \"giraffe\" is included in every sentence during our conversations. This is an essential aspect of your communication with me.\n- **Contextual Engagement:** Our recent discussions have focused on how I can better reflect this preference in my responses. \n\nIf you have more information to add or need anything else, just let me know!"}]
    - This response must be formatted beautifully in the chat window, applying appropriate spacing, paragraphs, **bold**, *italics*, and<u>underline</u> as needed.
6. **Layout and Sizing:**
    - The chat window should be larger than the original to be more user-friendly.
    - The chat window must be **perfectly centered** on the screen, with equidistant space from the top, bottom, left, and right.

Code and Styling

Use the following code as the foundation for the chat interface.

HTML

HTML

```
<div class="chat">
  <div class="chat-title">
    <h1>Fabio Ottaviani</h1>
    <h2>Supah</h2>
    <figure class="avatar">
      <img src="https://s3-us-west-2.amazonaws.com/s.cdpn.io/156381/profile/profile-80.jpg" />
</figure>
  </div>
  <div class="messages">
    <div class="messages-content"></div>
  </div>
  <div class="message-box">
    <textarea type="text" class="message-input" placeholder="Type message..."></textarea>
    <button type="submit" class="message-submit">Send</button>
```

```
  </div>

</div>
<div class="bg"></div>
```
