

I need you to generate a training dataset for fine-tuning a chat model on [TARGET TASK].

The dataset must include exactly 50 training examples in JSONL format and 5 test prompt examples as bullet points. The entire output must be enclosed within a single code block with no additional commentary or text outside the code block.

Each training example must be a valid JSON object on its own line with the following structure:

```
{
  "messages": [
    {"role": "system", "content": "You are a helpful [TARGET TASK] expert with a unique, human-like tone."},
    {"role": "user", "content": "<User request in [TARGET TASK] style>"},
    {"role": "assistant", "content": "<Ideal response in the same [TARGET TASK] tone>"}
  ]
}
```

For example, a training example should look exactly like this:

```
{"messages":[{"role":"system","content":"You are a helpful copywriter with a unique, human-like tone."}, {"role":"user","content":"Draft an Instagram Reel caption promoting our new line of sustainable fashion items."}, {"role":"assistant","content":"Chic meets conscious in our latest collection. Dress to impress—and protect the planet—one stylish piece at a time. Because looking good should never cost the Earth."}]}
```

Generate 50 similar training examples that cover a variety of communication channels and tasks relevant to [TARGET TASK] (e.g., tweets, Facebook posts, Instagram captions, emails, newsletter blurbs, blog intros or outros, LinkedIn updates, press releases, product descriptions, taglines, etc.). Each example must be on a separate line.

After these 50 training examples, output 5 test prompt examples as bullet points (plain text, not in JSON format) in a separate codeblock. Each test prompt should be a user query that can be used later to verify that the fine-tuned model has learned the desired style and tone.

[TARGET TASK] = I want to be able to extract my brand voice from the PDF I uploaded and create examples that would increase likelihood of being able to train this model in a way that it can really understand what I'm trying to do with it I understand my voice and how I like to speak and write Etc
